Education

Rajkiya Engineering College Sonbhadra

BTech in Computer Science and Engineering (2020 – 2024)

CGPA: 8.42

About Me

Dedicated Full Stack Web Developer and adept problem solver with a rich portfolio of real-time web projects. Proficient in MERN Stack, Python, C, C++, and Data Structures & Algorithms (DSA). Enthusiastic about continuous learning through practical problem-solving, always seeking to enhance skills and knowledge.

Projects

Ecommerce Website

- A cutting-edge shopping website, operating in real-time, mirroring the functionalities of top e-commerce platforms.
- Employed a tech stack encompassing HTML, CSS, and JavaScript across the frontend to guarantee a fluid and intuitive user experience.
- React.js, a powerhouse, enhances interactivity and responsiveness.
- On the backend, Node.js and Express.js efficiently process requests and deliver lightning-fast responses.
- MongoDB, capable of handling extensive datasets, serves as the database, supporting vast product catalogs.

TrendMov (Movie Recommendation)

- Created and managed a movie show website using Webs platform.
- Designed an attractive and user-friendly interface for movie listings and showtimes.
- Integrated a booking system for seamless ticket reservations.
- Collaborated with a team to curate and update movie listings and schedules.
- Ensured the website's responsiveness and functionality for an enhanced user experience

Achievements

- Demonstrated prowess by solving 600+ Data Structures and Algorithms problems on [LeetCode](#), [GeeksforGeeks](#), and [Coding Ninjas](#) platforms, showcasing adept problem - skills.
- Played an integral role as a member of the College Website team, actively participating in its development and maintenance.

Skills & Interests
